Summary

I am self-taught, my interest in technology started at an early age, professionally I started as a Microsoft systems and network administrator for a small manufacturing firm. I then moved on to do both **web design** with Flash and Action Script and 3D animation and visual effects using 3D Studio Max. Before moving back to do **technical support** in the Apple industry, starting with an Apple retailer and service center doing both hardware repairs and software support and finally moving on to do corporate support. Recently moved back into **web development**. Where I enjoy constructing user interfaces using **JavaScript, CSS** and **ReactJs** to solve interesting problems.

Skillset

```
{
  "Development-Languages": {
    "HTML": "5+",
    "CSS 3": {
      "Layout Tools": "FlexBox, CSS Grid",
      "Pre-processors": "Sass, PostCSS",
      "Frameworks": "Bulma, CSS-In-JS"
    },
    "JavaScript": {
      "Versions": "ES6+",
      "Libraries": "ReactJS, React Native, D3",
      "Build Tools": "Gulp, Webpack, Babel",
      "Server-Side": "Node.JS with Express.JS, Firebase, Netlify, REST APIs",
      "Testing Tools": "Jest, Ezyme, ESLint",
      "Additional Tools": "npm, Yarn, Git, Github, Bitbucket, Jira, Prettier"
    }
  }
}
